LUXURY VINYL FLOORING. VITERRA

Product presentation.

October 2018

VITERRA. VINYL FLOORING

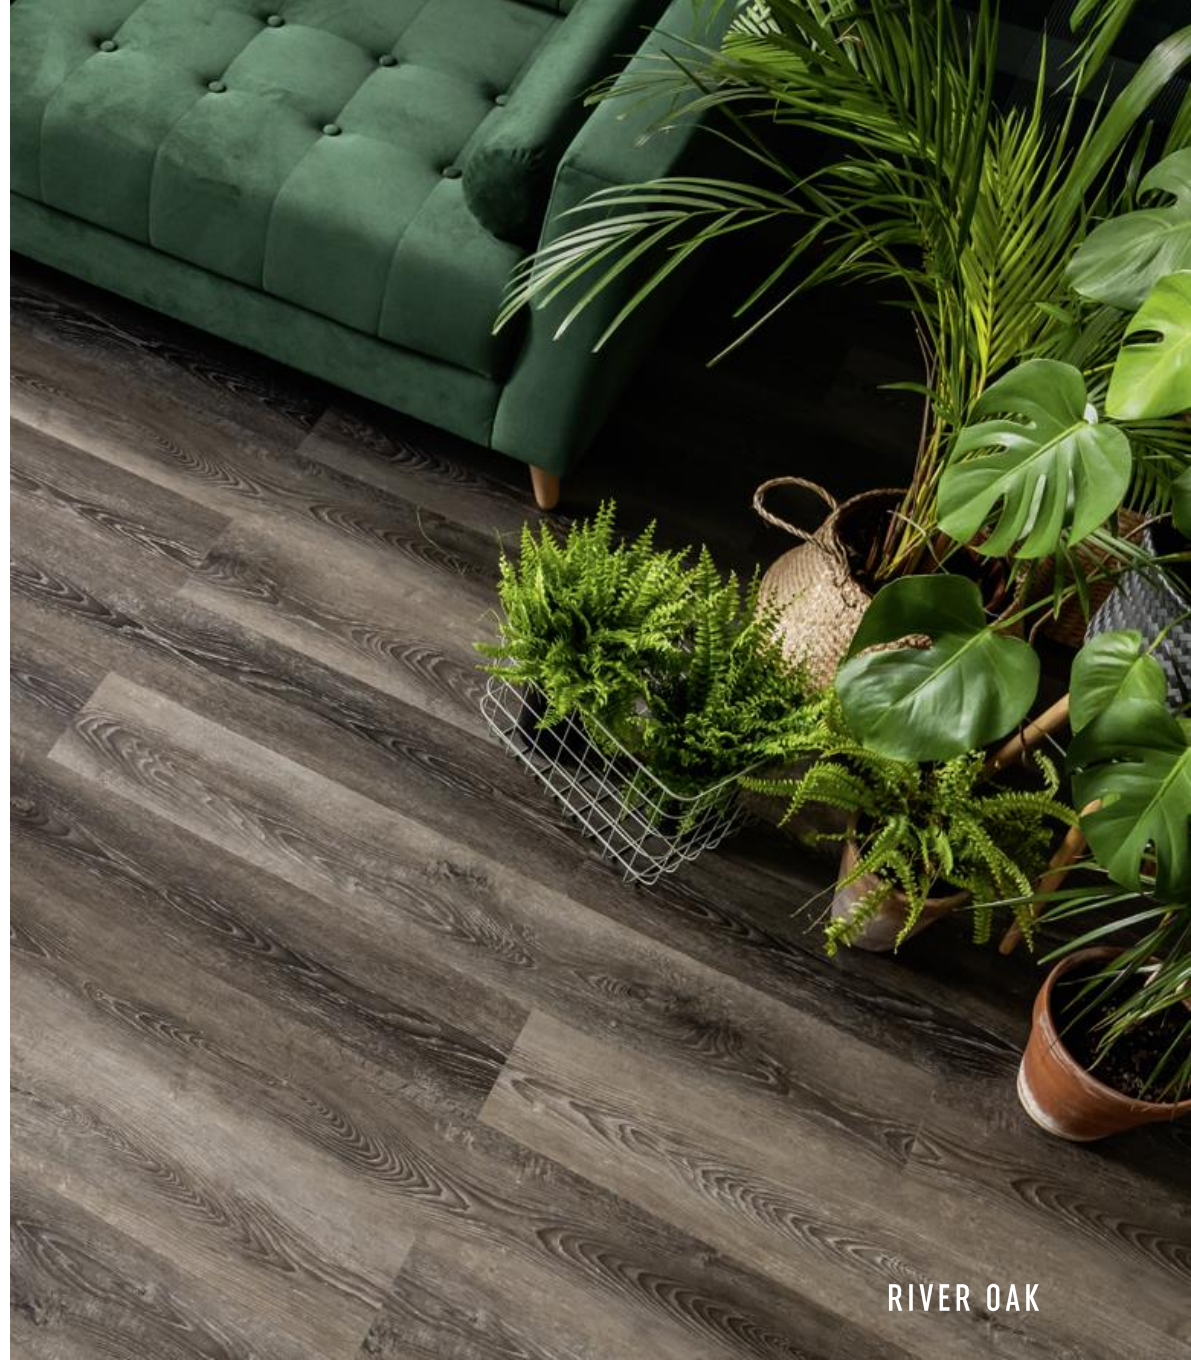

This floor will tolerate much more than laminate panels or wood. It is extremely resistant to dents, scratches and water. As a result it is a great solution for even the most demanding places, such as a bathroom, kitchen or hall.

LIGHT CONCRETE

VITERRA. THE COMFORT YOU NEED

Viterra vinyl floors are warm, quiet and comfortable. They are easy to keep clean, do not attract dust and have antiallergic properties. They are suitable for underfloor heating as they deliver heat quickly and more efficiently.

THE STRUCTURE OF VINYL FLOORING

DECORATIVE LAYER

The precise printing technique used for this layer gives our vinyl floor its authentic appearance of wood or concrete.

TOP LAYER

Protects your floors from dirt, stains and scratches, makes them easy to clean and maintain, guarantees a natural look.

STABILISING LAYER

This layer contains super dense glass fibres to give the vinyl floor additional dimensional stability. And resistance to changing temperatures.

VINYL BACKING

This moisture-resistant layer guarantees a perfectly balanced floor board which prevents cupping or warping.

VINYL CORE

Durable, water resistant and sound-absorbing core guarantees good quality for many years.

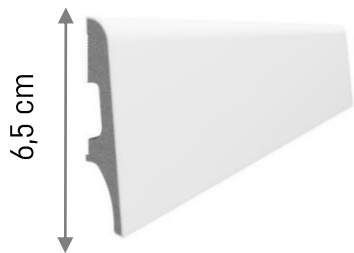

ESPUMO SKIRTING BOARDS. IDEAL FINISHING

Espumo skirting boards are a perfect match for vinyl floors. Produced in innovative Kerracore technology, they are light and extremely durable. Due to their water resistance, they are suitable for rooms exposed to moisture. What is more, you can paint them.
